

## TIER 1 ADVANCED POWER STRIP WITH CHARGING PORTS

### ENERGY SAVING SMART POWER BAR

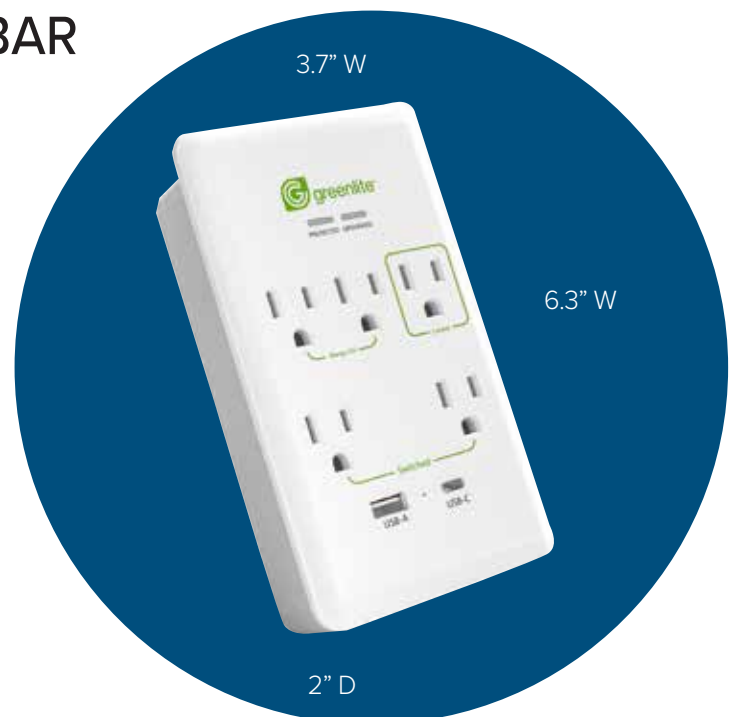

Imagine a stealthy energy thief lurking in your home, sipping power even when everything seems off. That's standby power for you, also known as vampire power or phantom load. But fear not! Enter Greenlite's Tier 1 Advanced Power Strip, your guardian against this unseen energy drain.

With surge protection and a clever control/switched mechanism, it combats standby power wastage from PC and TV peripherals. When your main device wakes up, it powers the strip, but when it rests, so do the outlets, saving you money and offering two charging ports for your gadgets.

1225 Joules

5 Outlets: 1 Control Outlet, 2 Switched Outlets,  
2 Always on Outlets

2 Always on Chargers: 1 Type-A USB Port up to 2.1A  
1 Type-C USB Port up to 3A

3.7" W

6.3" W

2" D

# TIER 1 ADVANCED POWER STRIP WITH CHARGING PORTS

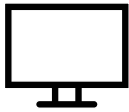

Eliminate excess usage and trim your utility bill. It works by cutting off power to connected devices when they're not in use, eliminating phantom and standby power losses without ever unplugging the equipment. Load-sensing technology detects the current being drawn through the control outlet, which is plugged into a primary device like a TV or computer. Then, peripheral devices like game consoles, DVD players or monitors are plugged into the switched outlets, which only become energized when a high current is detected in the control outlet, indicating the TV or computer is powered on. Always on outlets provide power at all times, so they can be used for devices that need power constantly, like modems and cable boxes.

## 1 CONTROL OUTLET

Controls the 2 Switched Outlets.  
For devices such as TV or computer (PC).

Computer

TV

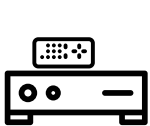

Resettable  
Circuit Breaker

Charge up your phone in style with our cool built-in shelf! It's the perfect throne for your device while it powers up.

## 2 "ALWAYS ON" OUTLETS

Always on regardless of the Control Outlet.  
For devices that should always stay on.

Cable Box

Router

Modem

## 2 SWITCHED OUTLETS

Controlled by the Control Outlet. For devices that are linked to the device plugged into the Control Outlet.

DVD Player

Printer

Game Console

## 2 CHARGING PORTS

1 USB-C Charger and 1 Type-C Charger.

Phone

Smart Watch
